

19 October 2011

To whom it may concern,

I have had the privilege to know Kevin Galalae for 31 years now. I consider him my oldest and best friend.

With great confidence I can state that Kevin is a warm hearted and caring healthy Human Being with an extraordinary sense of responsibility for himself and his people. In fact he is continuing the tradition of his family who has brought up only the finest scientists and doctors. Anybody with a only little interest in Kevin's curriculum cannot but stumble about these facts.

Moreover I would like to suggest that those who have attested Kevin any kind of sufferings from mental or psychological illness should lay down their profession because they are truly dangerous for the public health.

Best regards,
