CIA Inspector General - DOJ (Eric Holder's office)
Senator Dianne Feinstein - Rep. Marsha Blackburn -
Kim Helper the Williamson County DA - Governor Bill Haslam
American Bar Association Ethics Committee - Justice for Megrahi

My name is Sharyn Bovat & I'm the NISSAN Whistleblower.

Because I was born into a family that was known for being in the intelligence community I believe that is why NISSAN executives have bullied, jailed, slandered, harassed, and **now** it looks like former CIA that were connected to drug trafficking, people most likely connected to the Lockerbie cover-up- who are members of the American Bar Association conspired used the judicial system of the State of Tennessee to discredit me. I'm requesting a racketeering investigation, retrial and other remedies - that is why your getting this letter.

While working in relocation for NISSAN North America I discovered and reported to a NISSAN Motors board member issues of discrimination, corruption and wasteful spending of American taxpayer money (the was money they were taking from a Dept. of Energy loan).

On the executive floor at NISSAN I learned that the CEO hired ex CIA - an employee told me they were used to keep Ghosn "in control"... he knew them from Michelin. Later at NISSAN I was accused of using an alias while working at NISSAN-I responded that the name I was using was called a "married name." For the record the man I was married to for over a decade did NOT know I did research until NISSAN "outed" me - we're now getting a divorce and I'm losing custody of my child

After I whistle blew I was called into 4 meeting with 2 different HR leaders. Two on the executive floor with the VP of HR Mark Stout. He offered me money to be silent. He asked me if he gave me a check would I tell Carlos Tavares (that is the board member that I whistle blew to) and I told him "yes". That response triggered 3+ years of retaliation.

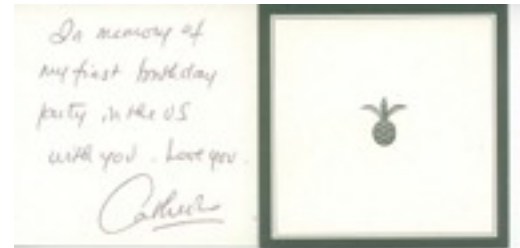

Nissan was took over 1.4 billion US tax dollars via the Dept. of Energy to build a car with outdated technology

History- In summer of 2008 I started working for Catherine Perez. She was the incoming VP of Purchasing. Some of her expenses were questionable an example is I was paid to locate spas for oxygen facials (she hated having dry skin). I asked if the spending was OK & HR did not mind her extravagant lifestyle that was supported by a cost center backed with taxpayer funded money.

Later Catherine & I became friends. In 2009 the highest level woman at NISSAN told me the company was having a severe cash flow problem. It was communicated to me the Dept. of Energy loan was to “pay the bills” - employees told me that the Leaf could not be a success the car really cost 63k-80k to build and that the battery would degregate quickly. Nissan can't afford to pay it back - collateral is a taxpayer backed IDB bond. An Obama bundler approved the loan.

I should mention that Catherine is the rumored former mistress of Carlos Ghosn the CEO. Evidently When they broke up she was put through a Harvard program then given the NISSAN North America job. Catherine “thought” I was cute and promised to help me get the job I felt like I deserved- which was to be in charge of relocation. Tennessee is a Good Ole Boy society and they did not like me for questioning their “real estate” deals so if I wanted a decent job dating her at the time seemed - sensible. I saved her notes and gifts. For the record I'm not gay. All I wanted was a job.

The percentage of women in management at NISSAN was 20.9% in 2006 and 10% in 2009. This data is from NISSAN's own statistics.

In spring 2009 when working for NISSAN board member Carlos Tavares I communicated problems: For example I told him in the winter of 2009 that the “Good Ole Boys” had put people in every division and they were going to fire the employees from California 1st- Mr Tavares stopped it from happening & it scared people in HR that he listened to me. They offered me money ONLY if I would not tell Tavares - I did the ethical thing & they bullied me. So I fought back by using my 1st amendment right & exposed their bad behavior on a blog.

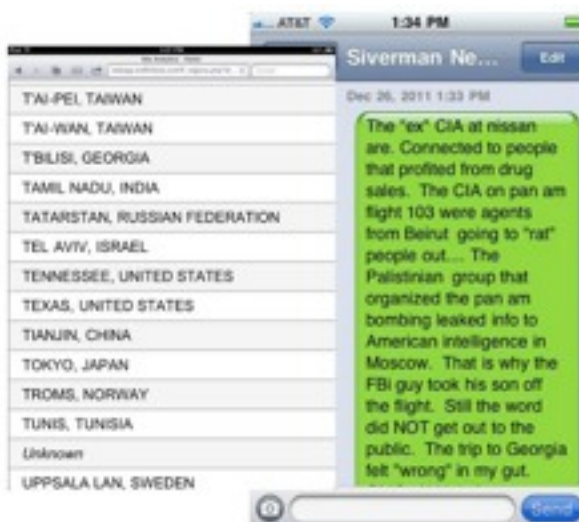

NISSAN executive's swore out warrants and then hired a lawyer named Joe Baugh to “babysit” the DA for a 1st time misdemeanor.

After being jailed on “trumped up” charges I blogged about more issues (I knew they were trying to discredit/scare me) so I wrote that the CEO of NISSAN being connected to ex CIA - that were involved with drug trafficking. I’ve blogged that the Lockerbie bombing was NOT done by who was blamed. & that **the Lebanese CEO of NISSAN will know WHO is responsible for the crash of Pan Am flight 103.**

At anytime the court could have done a mental evaluation. The only time one was requested (judge denied) was when I blogged that “if Good Ole Boys” were the only thing offered in Tennessee than I would consider “switching teams” I guess that made the DA question my mental health NOT the CIA stuff. Later I blogged about a person connected to Al Gore who suggested I “date him”- my response was rude because I thought it was a joke-Later I learned had I dated the man that almost became President the charges most likely would have been dropped. **Since 2009 - Al Gore was a big fan of my blog. I’ve learned my story is not weird it’s just Tennessee. Please look at different court cases. The courts in Tennessee allowed this to happen.**

My Girl in the Black Honda Website started June 4th 2009 during an 18 month timeframe had over 2 million hits from from over 100 countries.

FYI- I told Carlos Tavares the NISSAN board member I used to do research for operatives connected to Sal Russo & Karl Rove.

My uncle was Chief pilot for Pan Am - he testified at the intelligence committee in reference to the Lockerbie crash.

Kind-of Creepy: In 1988 while at the RNC convention a video of me was made saying the pledge of allegiance and later a wife of an Air

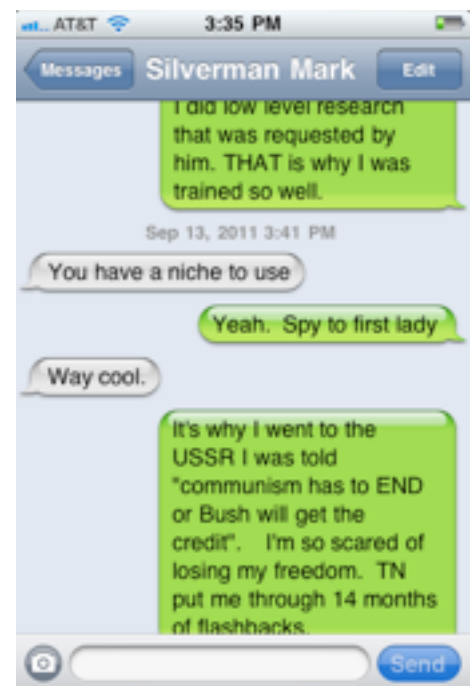

America pilot delivered a copy of the nationally televised ABC footage <http://www.youtube.com/watch?v=mZJjMB3O0Wo>

In 1990 I went to Leningrad for a bizarre trip and in December 1992 I went to Bahrain and Kuwait. There I met some of the “most likely” Lockerbie cover up team. In Bahrain they we’re having get togethers before the Clinton administration arrived (seemed like everyone I bumped into in the Middle East knew Oliver North- even people I bumped into in Honduras too. Mr. North later in the Bay Area gave me a “creepy” lecture on loyalty on a driveway.... he stopped me as I was walking up the driveway...it was just me and him - it freaked me out!!!).

2 years ago I put pictures me traveling on the web. One was a man that might be mentioned in the latest SCCRC report -the report that says Megrahi might have suffered a miscarriage of justice.

<http://carlostavaresrenault.com/France~Lebanon~Iran.html>

In 1998 I moved to the Netherlands for 3 years (I have no clue whether or not that move was calculated by someone?).

About a year ago from a man who worked at Boeing confirmed that the NISSAN CEO's dad was part of Operation Condor. Also after a forum at Georgetown University I told a guy from the DOJ my family was connected to Condor (That connection is very indirect) ... you should have seen the look in his eyes. OMG!!!

I'm sure that afternoon Eliana Davidson will remember my questions about cyber security. I have a court transcript showing that NISSAN made the “relocation consultant” the #2 security risk. They put me in the cyber system as a threat. That act “outed me” and terrified me.

Brief History

My grandfather Karl Frisbie started his career in naval intelligence: attended training in Princeton & lived in Korea in the late 40's. Nobody really knows what he did. He was a lawyer for the DOD and a triple dipper. I learned he was linked to Condor but I do not know any details.

My mom Carolyn Bovat lived in Tokyo in the 50's working as Chief stewardess for Transocean Airlines, she trained women to spy for America. They were subsidized by the CIA. In the mid 80's her boyfriend a 747 captain for World Airways was known as the "gun runner" this is the Iran Contra era. He disappeared mysteriously later we found out he was not dead but in Panama City (he feared witch hunts). Later in December 1993 I was told my life could be in danger so I too disappeared (not to the extreme as him) but I left California all my friends just to be "out of sight-out of mind" I got married in the late 90's and never told the man my family was connected to the CIA.

So do YOU all now see how I'm connected to the intelligence community? if you have questions call me 615-944-7599.

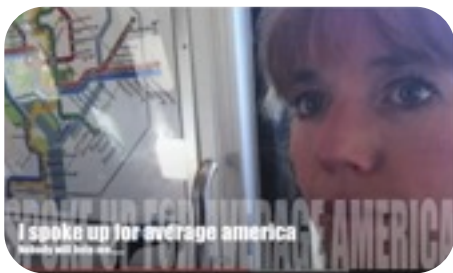

Please contact Mark Silverman the Ben Bradlee winning editor of the Tennessean who also got a Pulitzer Prize nomination. He's my friend and knows the issues. OK - I admit in 2011 the Gannett editor and I started sleeping together. From the beginning I told him I was NOT a real spy - I was a just a "friendly fixture".... who helped out CIA operatives.

Silverman was the neighbor of a CIA field chief named Freddie Woodruff who was murdered in Georgia 1993-It was the same year that I was asked to go on a democracy trip - luckily I did not go Aldrich Ames was ratting out spies/ friendly fixtures.

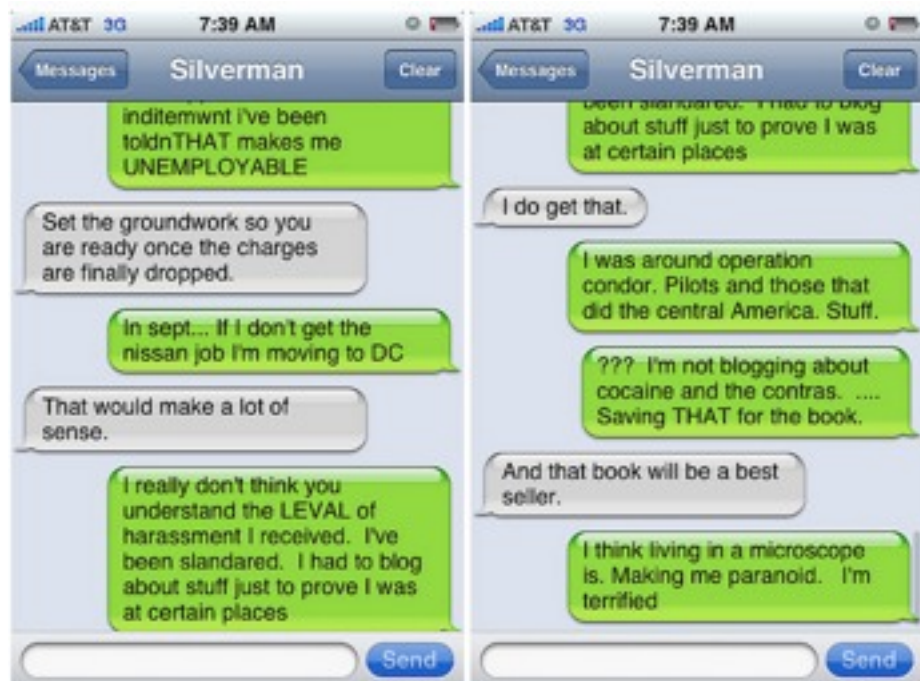

Google: Freddie Woodruff CIA

More History- The airline people in the 50's were a tight knit group. My family were just PILOTS. They did what they were told. We never became rich and never used connections to profit. Once again I do not know details about what they did. I know my dad flew flights in Laos & I met a Condor pilot when I was a child. I was with Ed Daly my dad's boss when he and "Ford's guy" were talking about the Vietnam war (Former President Ford had tacos with me backstage of the 1992 RNC convention in Houston).

In 1980 I attended a boarding school and was the roommate of a girl from El Salvador. Her family led death squads - remember the whacked priest? Her mom used jewelry from dead jews to pay for her Gucci purses. *When I wanted a new purse I was told no and later sat on a flight next to a Holocaust survivor who talked the entire time about her ordeal.*

In the mid 80's I was engaged to Tom Huffaker a divorce lawyer who "out of the blue" got into the foreign service. He did 2 tours in Moscow.

Also, in the mid 80's Nancy Reagan was worried that our top scientist would tell Russian spies secrets so I dated one - he was really smart named Glen McWright. He worked at the time at Lawrence Livermore Lab- he never talked about work and today "I Think" he's a top DOD Scientist working at DARPA & the NSA Liaison.

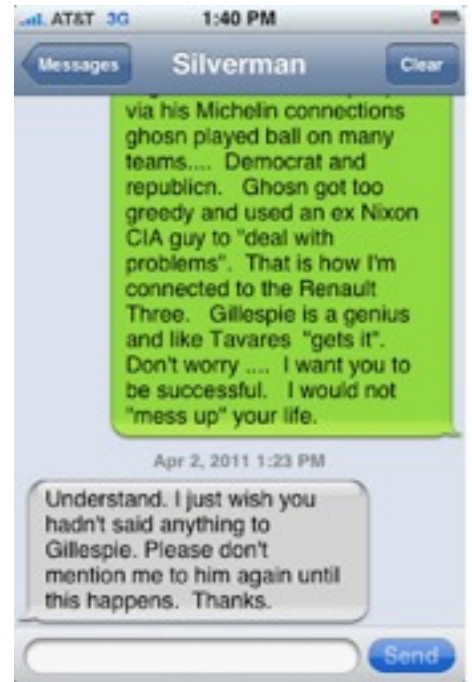

This is an email between me and Mark Silverman in reference to the Renault Spy Scandal.

It should be noted that the Strauss Kahn incident just like the Renault Spy Scandal is most likely a CIA "dirty trick"... Can someone investigate?

Holder's guy said to civilly sue NISSAN & the nations of Japan and France for the cyber "outing" ... Why can't the gov't. investigate? What happened to me should NOT happen to anyone else.

12 hours after I emailed facts to Ed Gillespie about the EV fraud (Sept 2011) Senator Lamar Alexander stepped down from his #3 GOP leadership role.

Here's the Main Issue:

2 years AFTER working with my lawyer fighting "trumped up" charges that I believe were done to discredit me . I told my lawyer they stemmed from my "previous" CIA research and the cover up of the Lockerbie Bombing. He says his brother is the CIA's top lawyer.

In 2010 I told Kline Preston that Iran was responsible for the crash. I found out LAST WEEK that my attorney's brother was the TOP lawyer (Stephen Preston) of the CIA.

Do you see the CONFLICT OF INTEREST?

This fact alone requires investigations & a retrial of the misdemeanor with a maximum penalty of a \$50 fine.

I felt “raped”- 2 years using a lawyer that’s discrediting me on purpose or used very poor professional judgement. I blog about it: **FYI - I had not blogged about my attorney UNTIL I was told this information.**

Later Kline Preston my lawyer told me that "it was a joke" ... so I told him that once he sends me a "notarized" affidavit saying that Stephen Preston is NOT his brother then I will take the topic off my blog. Also, on the blog it tells Stephen Preston to have someone contact me to "clarify" & nobody has done that. Also I sent in a request to the DOD via the Press office on clarification as to the relationship of Kline and Stephen Preston. I’ve had no response.

Google

Stephen Preston CIA

my picture keeps popping up I suspect the Intelligence community is aware of the issue.

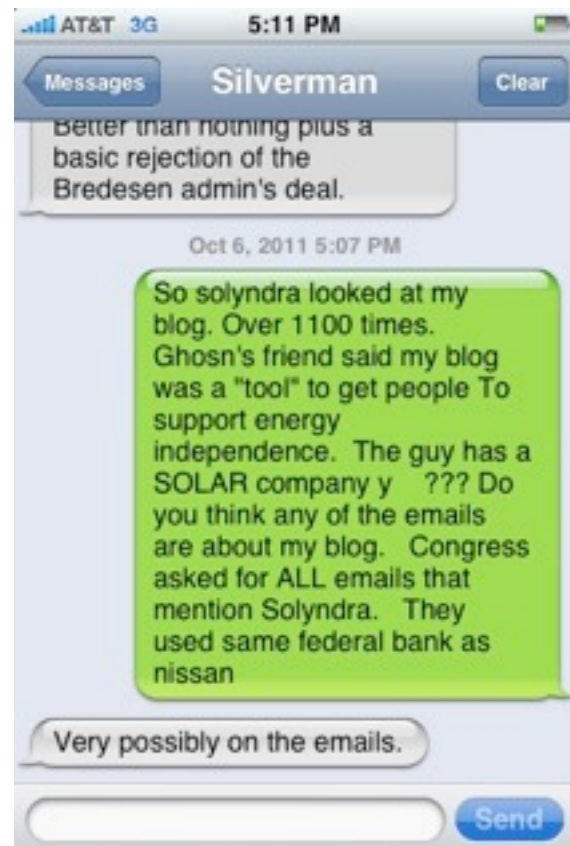

Last comment on Lockerbie:

To protect the confidentiality of a source of money that I obtained legally & paid taxes on that might be useful to the intelligence committee so they can quickly start asking questions that will get the truth about the crash of Pan Am Flight 103 I will offer to testify under oath in a closed door Senate intelligence committee hearing -

FYI- I do NOT trust the CIA due to the Brothers Preston.... are they “really” brothers?

FYI- Iran ordered it. that is my opinion & have facts to back it up.

This email shows that Gannett executives “think” the White House knew about me. Lots of blackberries read my blogs.

Subject: Death threat of sharyn bovat traced to church newsletter

Request:

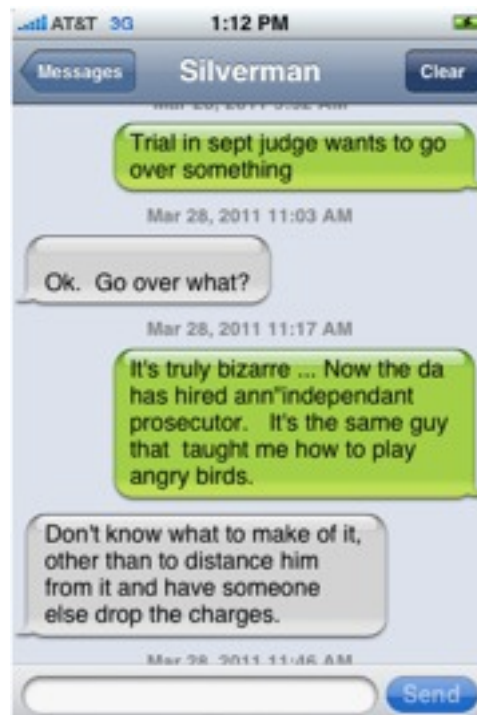

Kline Preston has recently emailed me saying he is withdrawing as the attorney of record.

For 19 months I suffered charges in the Tennessee courts. For over 3 years suffered death threats, & retaliation. I have a child and need resolution.

Again: the charge that was dismissed in the summer of 2010 was then brought back in a "secret" grand jury. They used an email about my personal life to indict me on the previously dismissed charge. The people in Tennessee are VERY conservative and do not like what they call my "California morals" that charge was then dismissed again in

February 2012.

Over 3 years of being bullied because I whistle blew & the ONLY thing I was found guilty of (& I still claim my innocence) is the lowest level misdemeanor that had a maximum penalty of \$50.

It's = to a speeding ticket. Occupy protestors in Tennessee were charged the same crime and SELECTIVE prosecution was done to me. Lots of Tennessee politicians have profited from "green" industries.

Most of my subpoenas were quashed 2 days before trial. My lawyer lied &/or was very unprofessional.

I've learned that racketeering is happening in Tennessee and I would hope it's being investigated. Recently the state comptroller for the state has found excessive reasons for concern. **This issue is connected to the Tennessee ECD programs.**

In tennessee I was "set up" to be discredited for MANY reasons. I fear that the CIA wanted that to happen. The courts in Tennessee let it happen. **This letter is a request to the Williamson County DA to insist on a retrial of the misdemeanor:** due to the deception by my attorney & a call for a FULL inquiry on how a 1st time misdemeanor could get so "far" into the court system. How was I jailed 3 times?

The Governor of Tennessee needs to issue a statement that I Sharyn Bovat am a person of good character. It needs to be clarified that the charge of stalking was dropped twice & it was "email" stalking (harassment) because I sent emails to NISSAN executives telling them to NOT discriminate and waste taxpayer money

NISSAN "swore out" warrants that led to me being jailed 3 times. How?

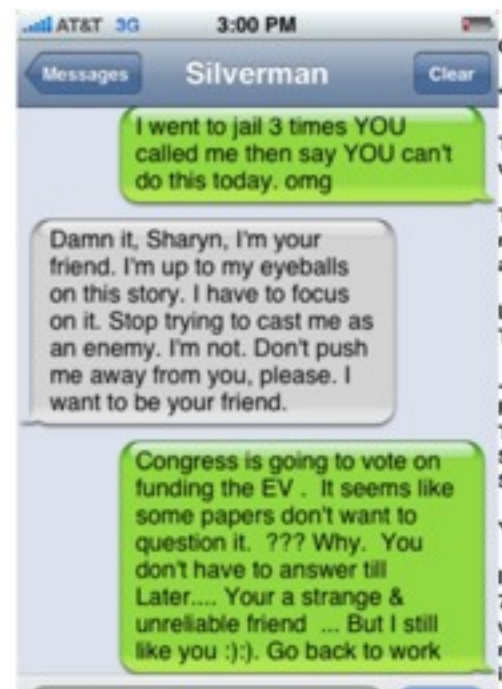

I've got probable cause that the now "ex" Tennessean business editor Randy McClain might have participated in jury tampering. I would like to hand that evidence to the DOJ to investigate.

Gannett know about massive discrimination at NISSAN, they knew the Leaf EV would not succeed yet they did not report it.

People at Gannett got "goodies"....

If you look at how the response was written by Baker Donelson a Tennessee firm you will see that NISSAN clearly uses the words "stalking" over and over again. That is something I did NOT do. To this day with their response on file I'm STILL being slandered in the courts. I'm unemployable while this is happening.

Upon request I will provide FULL transcripts, witnesses and documents.

The NISSAN executives and the courts in Tennessee took away my constitutional rights and I'm fighting for my dignity and for RESPECT for ALL People.

The CEO of a foreign company that unethically took American tax dollars Carlos Ghosn is connected to Iran Contra profiteers and the Lockerbie cover up & I think the Chairman of Renault/NISSAN should be forced to testify under oath on both those issues- this can happen in TN at my 1st time misdemeanor with a maximum fine of \$50 “retrial” ...

The era of promoting people connected to CIA drug trafficking, corruption and profiteering needs to end. It would be nice to see the intelligence community stop destroying the lives of ALL whistleblowers that speak up for what they believe is true and morally right. Respectful investigations should happen.

The premature launch of the electric car was just a “false flag” operation that was meant to scare away future gov't investments in electric cars.

People in the Middle East connected to Carlos Ghosn and Al Gore did NOT want America energy independent.

What NISSAN did by taking over 1 billion us tax dollars to build a car with outdated technology. Using a 2 billion dollar Rutherford County IDB bond as collateral - knowing they could not make a successful affordable EV & they can't afford to pay back the loan- thus burdening the taxpayers using a Treasury guarantee is a crime.

Because of the NISSAN Leaf failure members of congress will think twice before allowing so much money to be wasted.

My grandfather (pictured with me in front of the Monterey Peninsula Country Club) was a true genius told me that respect for the rules of law creates a civilized society & my ultimate goal is to live in one.

Thank you,

Sharyn Bovat
